

COMsolve

CONSULTING SERVICES

COMsolve offers a wide range of in-depth consultation services regarding operational matters, technological solutions, and telecom policy issues.

WHY CHOOSE COMSOLVE

 Experienced telecom and project management professionals with extensive numbering and interconnection experience.

 We operate the Canadian Numbering Administrator (CNA), the entity responsible for administering and issuing telephone numbers and other telecommunication codes in Canada.

We stay up to date with ISED Canada and CRTC policies regarding the Canadian telecom industry, activities under the auspices of the Canadian Interconnection Committee (CISC), and activities by standard development bodies.

OPERATIONAL CONSULTATION

We offer in-depth consultation regarding operational matters including mandated interconnection, access, mandated resale, roaming, routing and port processes.

TECHNOLOGICAL SOLUTIONS

Gain insight on new technology solutions such as STIR/SHAKEN, 5G wireless, Next Generation 9-1-1, Operational Support Systems, business process automations, and future regulatory & industry framework policy directions of leading-edge tech solutions.

TELECOM POLICY

Stay up to date on the latest telecom policy matters including issues such as call blocking, numbering, numbering, and spectrum issues.
