

# COMsolve

## STRUCTURED CABLING

COMsolve offers a wide selection of design, installation and testing of customized cabling systems for variable-size networks including data centers, central offices, and network rooms.

### WHY CHOOSE COMSOLVE

Experienced telecom, project management, and IT professionals who take responsibility for your project.

Implement your project on-time and on-budget by a dedicated team of BICSI RCDD certified professionals.

From small network cable runs to complex rack work, we understand the wired infrastructure that determines your available bandwidth and network capacity is the backbone for network reliability and efficiency.

### STRUCTURED CABLING OFFERINGS

#### DESIGN & PLANNING

Customized design of structured cabling solutions such as network cabling, distributed antenna systems, data center management, and rack installations.

#### HIGH QUALITY INSTALLATIONS

Cost-effective installations of all forms of certified voice, video, and data cabling including Fiber Optic, Twisted Pair & Coaxial, Category 5e & Category 6, Ethernet & WLAN, Patch Panels & Trunk Cables, and Switches.
